

TWO Tabs :

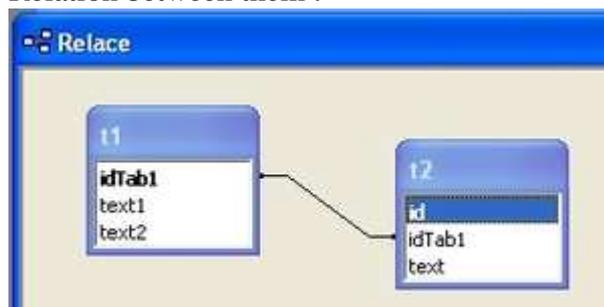

t 1

t1 : Tabulka			
	idTab1	text1	text2
▶ +	1	AAA	aaa
+	2	BBB	bbb
+	3	CCC	ccc
+	4	DDD	ddd
*	omacické číslo)		

t2

t2 : Tabulka			
	id	idTab1	text
▶	1	1	ooo
	2	1	ppp
	3	2	iii
	4	3	jjj
*	omacické číslo)		0

Relation between them :

Query 1 :

dot1 : Výběrový dotaz

Pole:	idTab1
Tabulka:	t2
Souhrn:	GROUP BY
Řadit:	
Zobrazit:	<input checked="" type="checkbox"/>
Kritéria:	
nebo:	

Query 2:

dot2 : Výběrový dotaz

Pole:	idTab1	text1
Tabulka:	t1	t1
Řadit:		
Zobrazit:	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Kritéria:		
nebo:		

Result :

dot2 : Výběrový dotaz			
	idTab1	text1	text2
▶	1	AAA	aaa
	2	BBB	bbb
	3	CCC	ccc

Result is alright, but problem is that now I cannot modify data in this result Table – beep sound and nothing happened. I think it is because using GROUP BY in query. How can I achieve this result with possibility of modifying data ...?

Thank you !
