## NOTES ON ACCESS RUNTIME INSTALLATION

When the Access2000 Runtime starts it suggests C:\program Files\Microsoft Office\Office as the installation path.
Microsoft Access 2000 Runtime: Ready to Install

Install Now
Install Microsoft Access 2000 Runtime at C:\Program Files\Microsoft Office\

Customize...
Choose the installation location for Microsoft Access 2000 Runtime

Cancel

Do not accept this as the installation path

Click on **Customise** and change the path to read C:\MyCoName\   as shown below

Microsoft Access 2000 Runtime Installation Location

Install Microsoft Access 2000 Runtime at:

C:\MyCoName\   Browse...

Then click on the Ok button and you will return to th C:\MyCoName\ : installation path should now be changed to
C:\MyCoName\   as shown bellow.

Install Now
Install Microsoft Access 2000 Runtime at C:\AC2000\

Then continue with the installation by clicking on the **Install Now** button
(NOTE! C:\AC2000 shown will be C:\MyCoName\ )

If you have more than one copy of access on the computer you will need to adjust the shortcuts to point to the
correct versions.   You should change the shortcut target from C:\MyCoName\ProgName.mde to be as follows :
   C:\MyCoName\Office\Msaccess.exe C:\MyCoName\ProgName.mde

NOTE! If you there is a version of Access97 RunTime installed then it should be uninstalled first of all.
