

Microsoft SQL Server DSN Configuration

How should SQL Server verify the authenticity of the login ID?

- ☐ With Windows NT authentication using the network login ID.
- ☒ With SQL Server authentication using a login ID and password entered by the user.

To change the network library used to communicate with SQL Server, click Client Configuration.

Client Configuration...

- ☒ Connect to SQL Server to obtain default settings for the additional configuration options.

Login ID: I08127E
